Professional Summary

Computer Engineer Learning Modern Architecture in cloud computing. I completed my internship learning about Containerization, Cloud Security, and Multiple Cloud Platforms, with hands-on experience on DigitalOcean, AWS, Docker, SAP Cockpit & Microsoft Azure.

EDUCATION

MBIT, CVM University

Bachelor's in Computer Engineering(BTECH)

Coursework: Cloud Computing, Networking, Database Management System

May 2027

Anand, India

EXPERIENCE

KERYAR {Hosted Website: zarklyx.duckdns.org}

May 2026 - June 2026

(Cloud Engineer)

Anand(On-Site)

- Deployed a web application (Tech Stack: PEAN & Database: Postgres & Redis) on DigitalOcean using Containerization, Dockerfile, and an automated CI/CD Pipeline using GitHub Actions.
- Optimized research on Hybrid-Cloud Architecture helps firms keep data private with minimal cost on the cloud and prevents them from vendor lock-in.

BVM

June 2026

(Cloud Engineer)

On-Site

- Completed AWS Academy Solution Architect with hands-on lab assignments of AWS Services, hosted justyummybakery.tech using Vercel. Learnt about Production-based use of cloud platforms like to host a website, S3 for frontend files, EC2 for Backend Logic(attach to private VPC for better security), ACM for SSL/TLS certification, Route 53 for secure DNS routing using a domain registrar like GoDaddy, and CloudFront for Global reach (CDN).

SKILLS

Cloud Platform: Amazon Web Services (AWS), DigitalOcean.

Technical Skills: Networking, Cloud Computing, Bash Scripting, Python Programming.

Certificates

- [AWS Academy \(Cloud Foundation\)](#)
- [SAP-Backend-Developer \(ABAP\)](#)
- [AWS Certified Cloud Practitioner](#)
- [SAP-Backend-Developer \(CAP\)](#)

Extra-Curricular

Enrolled in the SAP E2E (Educate to Employee) Program managed by Edunet Foundation.
